SUMMARY

Creative Frontend Developer and Computer Science student with experience building modern web applications that combine intuitive user experiences with AI-powered functionality. Through my internship, startup competitions, and hackathon participation, I have contributed to production web applications using Next.js, collaborated on AI-integrated interfaces, and expanded into full-stack development with Python, FastAPI, PostgreSQL, Docker, and Git.

I enjoy transforming complex ideas into responsive, accessible, and visually engaging digital experiences while continuously exploring how AI can improve user interaction and product design.

EXPERIENCE

Full-Stack Development & UI Intern | MakerSpace InnovHub OPC
June 8 - July 18

Tech Stack: Next.js • JavaScript • Python • FastAPI • PostgreSQL • Docker • Git • Ollama • LangGraph

- Developed responsive user interfaces and interactive pages for a production Next.js e-commerce platform and internal administration dashboard.
- Collaborated on integrating AI-powered chat and content generation features, translating AI outputs into intuitive and user-friendly interface components.
- Expanded beyond frontend development by contributing to backend workflows using Python, FastAPI, PostgreSQL, Docker, and Git, enabling more effective collaboration across the development lifecycle.
- Selected to participate in the AMD Developer Hackathon (Act II), contributing to AI application development using Ollama and multi-agent workflows with LangGraph.
- Worked closely with designers and developers to deliver scalable, accessible, and maintainable web solutions.

Lead Developer & UI/UX Designer | CareCrate (DICT Startup Challenge Finalist)
November 2024

- **Achievement:** Recognized as a Regional Finalist in the Department of Information and Communications Technology (DICT) Startup Challenge, competing against 50+ student-led tech startups.
- **Local Presentation:** Selected to pitch the project to a panel of government officials and industry experts, successfully demonstrating the hardware-software integration and market viability for a medication management system for dementia patients and the elderly.
- **Design & Development:** Engineered a companion mobile app for a physical medicine box, utilizing UI/UX best practices to ensure a 90% accessibility rating for elderly users with cognitive impairments.
- **Impact:** Reduced potential medication errors by streamlining the interface to a 3-click notification-to-action process.

Marketing Director | Society of Integrated Commercians for Academic Progress (SICAP)
August 2025 – Present

- **Growth:** Spearheaded digital marketing strategies that increased social media engagement across Facebook and Instagram within one academic semester.
- **Campaign Management:** Led a creative team to promote departmental events, resulting in a consistent increase in student attendance compared to previous years.
- **Branding:** Designed high-fidelity digital assets and promotional posters that standardized the organization's visual identity.

Staff Writer | SCHEMA SLU (Official Publication of SAMCIS)
August 2024 – Present

- **Content Creation:** Authored articles and blog posts focusing on technology trends and campus life targeting students from School of Accountancy, Management, Computing and Information Studies.
- **Collaboration:** Worked closely with the design team to ensure written content and visual layouts were synchronized for maximum reader engagement.

SELECTED PROJECTS

AI-Powered E-Commerce Platform

- Built responsive, production-grade UI components for a Next.js e-commerce storefront and its companion /admin/seo administration panel, translating backend agent outputs into clean, user-facing interfaces.
- Integrated AI-powered chat into both customer-facing and admin experiences by building StorefrontChatAgent and AdminChatAgent on a shared ChatAgent base class, and surfaced intelligent content generation — including automated E-E-A-T content scoring — through the admin dashboard.

OASIS- AI Glaucoma Screening Platform

- Developed the frontend interface for an AI-powered glaucoma screening platform using a Siamese Neural Network.
 - Designed responsive upload workflows for retinal images while prioritizing usability and accessibility.
 - Collaborated on integrating AI inference into a modern web application.
-

EDUCATION

Bachelor of Science in Computer Science

Saint Louis University | Baguio City, Philippines 2600 — August 2023 – Present

- Consistent Dean's Lister
-

KEY SKILLS

- **Design & Front-End:** Front-End Development (HTML/CSS/JS, Next.js), Mobile & Web UI Design, Prototyping (Figma/Canva).
- **AI & Full-Stack:** Python, FastAPI, PostgreSQL, Git/Docker, AI-assisted development workflows, working knowledge of multi-agent orchestration (LangGraph) and local LLM tooling (Ollama) gained through OJT and hackathon work.
- **Marketing:** Social Media Strategy, Content Analytics, Brand Visual Design, Growth Marketing.
- **Soft Skills:** Public Speaking (Pitching), Technical Writing, Cross-functional Leadership.
